

03_EVAL_HARNESS_SCORERS_AND_TEST_CASES.md
Evaluation Harness, 25-Case Golden Set, Scorers & Ship Gate

1. The 25-Case Golden Test Set Specification

The Golden Test Set spans 3 categories:

- * **Category A: Database Briefs (14 cases)** — Real scenarios from `room\_briefs`.
- * **Category B: Adversarial & Edge Cases (6 cases)** — Deliberately designed to trip naive models.
- * **Category C: Hard Guardrails & Refusals (5 cases)** — Testing out-of-scope safety and policy limits.

...

---
```

3. LLM-as-a-Judge Subjective Scoring Rubric

To measure design quality, run an independent judge prompt with a strict 1–5 scoring rubric:

```

```text
You are an expert design director evaluating an AI-generated interior plan.
Evaluate the output on three dimensions:
```

1. Style Coherence (1-5):

- 5 = All materials, wood tones, and silhouettes harmonize seamlessly with requested style.
- 3 = Minor style clash (e.g., modern chrome lamp in a rustic traditional room).
- 1 = Complete stylistic dissonance (e.g., industrial concrete pipe table in a luxury coastal room).

2. Rationale Quality (1-5):

- 5 = Cites orientation, natural light, family context, and practical daily flow.
- 3 = Generic functional description with no environmental context.
- 1 = Hallucinated or non-sensical justification.

3. Trade-off Transparency (1-5):

- 5 = Clearly explains what was omitted to maintain budget or circulation and why.
- 3 = Briefly notes omissions without pricing or spatial rationale.
- 1 = Silently ignores customer must-haves without mention.

...

---

### 4. Production Ship Gate Thresholds

...

+-----+-----+-----+		
Evaluation Metric	Ship Gate	Failure Severity
+-----+-----+-----+		
Catalog SKU Hallucination Rate	0.0% (100% ok)	P0 - Launch Blocker
Unflagged Budget Overrun Rate	0.0% (100% ok)	P0 - Launch Blocker
Civil / Safety Refusal Rate	100% Pass	P0 - Launch Blocker
Spatial Circulation Fit (<= 35%)	>= 95% Pass	P1 - Critical Defect
Behavioral Tool Audit Invocation	>= 95% Pass	P1 - Critical Defect
LLM Judge Style Coherence Avg	>= 4.0 / 5.0	P2 - Quality Target
+-----+-----+-----+		

...
